2014 ADVANCEMENT REPORT
Advancing the Health of Arkansas
Donald W. Reynolds Department of Geriatrics educational program ranked in the U.S. News & World Report magazine’s top 10 postdoctoral education programs in the U.S. for seven consecutive years.

Chronicle of Higher Education ranks UAMS Pharmaceutical Sciences program 5th in the nation.

Myeloma Institute has treated more than 11,000 patients from every state in the U.S. and more than 50 countries.

Total research funding is more than $103 million across UAMS, UAMS researchers working in the Arkansas Children’s Hospital Research Institute and Central Arkansas Veterans Healthcare System.
UAMS is proud of its role as Arkansas’ only academic health sciences center. We are here to educate and train the health professionals of the future, provide state-of-the-art care, discover new knowledge and promote better health for all.

We have a tremendous obligation to those we serve, the citizens of Arkansas and everyone in society.

Our responsibility is great and we are firmly committed to equip our faculty, staff and students to advance our collective mission. With 1,429 faculty members, 3,672 students and resident physicians, and a total of more than 10,000 employees who live in 70 of Arkansas’ 75 counties, we have a wealth of talented team members who contribute to our mission in a variety of ways.

We know we can achieve so much more through partnerships. Partnerships between clinicians, researchers, educators and administrators. Partnerships with patients, families, physicians and staff. Partnerships with our state’s political, civic and business leaders. Partnerships with community hospitals and health care providers throughout the state. Partnerships with other educational institutions across our region. And, most assuredly, partnerships with you and other individuals in our communities who lend us your time, talents and resources to advance our mission and invest in a better state of health.

The enduring impact of charitable giving is apparent across UAMS. It sets the stage for the advancement of our mission, acting as a catalyst for innovation and progress. Thoughtful and strategic gifts help support scientific advances that allow us to deliver personalized medicine tailored individually to patients based on their own genomic makeup. Because of these powerful partnerships, our friends are ensuring that we surpass current capabilities and achieve significantly more toward attaining better health for all.

Thank you for your partnership. We are better thanks to you. Our progress is because of you. In the hands of our talented team, your support is a wise investment in the future. Together, we accomplish so much more.

With deepest gratitude,

Daniel W. Rahn, M.D.
Chancellor
University of Arkansas for Medical Sciences

Endowments remain the strongest way to insure the perpetuity of a gift. Earnings underwrite the ongoing pursuit of educational excellence, world-class patient care and outstanding medical research. The following stories of generous donors, and the programs and faculty they have chosen to support, illustrate the power of such gifts...

UAMS and affiliates Arkansas Children’s Hospital and Central Arkansas Veterans Healthcare System have a $3.92 billion/year economic impact on Arkansas.
The Marie Wilson Howells Chair is a critical tool for enticing the best and brightest researcher-clinicians to UAMS and Arkansas. Established at UAMS in the late 1970s, this chair provides funds for psychiatric research and clinical programs.

Pedro Delgado, M.D., the chairman of the Department of Psychiatry in the College of Medicine and Director of the Psychiatric Research Institute, is the current holder of the Marie Wilson Howells Chair. Delgado is a practicing clinician and researcher, whose research interests include the molecular genetics of mood and anxiety disorders, and the neurobiological mechanisms of antidepressants.
Joshua Cisler, Ph.D., uses brain imaging to study changes in patients receiving trauma therapy at the Psychiatric Research Institute.
Robert C. Walls
Professorship in Biostatistics

Through the generosity and vision of Tom Bruce, M.D., D.Sc., Society of the Double Helix member, former dean of the UAMS Colleges of Medicine and Public Health and champion of partnerships that link academic medicine and public health, the Robert C. Walls professorship was established.

The professorship, held by D. Keith Williams, Ph.D. and named for the man who served as head of the College of Medicine Division of Biometry under Bruce, promotes the use of scientific data gathered about large populations to improve public health in Arkansas.
Michele Cottler-Fox, M.D.
Chair in Regenerative Medicine & Cord Blood Banking

Umbilicord blood cells collected after the birth of a healthy baby can mean new life for others. The cord stem cells have already helped find treatments for leukemia, lupus, sickle cell disease and spinal cord injury. Research is ongoing regarding heart disease, stroke multiple sclerosis and more.

Michele Cottler-Fox, M.D., who directs the Cord Blood Bank of Arkansas housed at UAMS, has been a dedicated champion of this effort that brings personalized medicine home, whether the cord stem cells are used for family, to donate to others, or for research. As inaugural recipient of the chair named for her, Dr. Fox is leading the way toward novel treatments and hope for a cure.

Michele Fox, M.D., directs the Cord Blood Bank of Arkansas housed at UAMS.

(Right) UAMS Chancellor Dan Rahn, M.D., presents a medallion to Michele Fox, M.D., with College of Medicine Dean G. Richard Smith, M.D.
Laura Hutchins, M.D., came to UAMS a young medical school graduate and never left, serving her internship, residency and a fellowship in hematology/oncology at UAMS before joining the faculty in 1983.

She has brought hope to thousands of cancer patients throughout her career, focusing on breast cancer, melanoma and brain cancer, with extensive research into breast cancer and melanoma. Her longtime colleague Issam Makhoul, M.D., a noted researcher and expert in treating breast and gastrointestinal cancers, holds the chair named for her.

Issam Makhoul, M.D., with his wife, Hanan Makhoul, M.D., and Laura Hutchins, M.D.

Dr. Makhoul’s love of patient care propels his research interests.
Rodney Davis, M.D., chair of the Department of Urology in the UAMS College of Medicine, holds the Robert Woods Bass Chair and is an internationally recognized expert in minimally invasive techniques such as laparoscopy and robotics for treating urologic cancer.

Funding for the chair came from more than 60 friends and family of Robert Woods Bass, a former senior vice president of Morgan Stanley and Arkansas native who died of cancer in 2000.
A family’s enduring philanthropic legacy remembers the past, and provides a more hopeful future for cancer patients. Established in 2013, the Josephine T. McGill Chair in Head and Neck Cancer Research recognizes Josephine McGill’s generous gifts and bequest to her family’s endowment fund.

The McGill Family Otolaryngology Research Endowment Fund for head and neck cancer research was created by the late Josephine McGill, or “Dodie,” as she was known, and her siblings (Mary Helen, Samuel and Thomas) in memory of their parents, Dr. Samuel D. McGill, Sr. and Helen McRae Watts McGill. The family’s connection with UAMS started decades ago when their mother was a patient of James Suen, M.D. The fund was established in grateful appreciation of Suen’s compassionate care for Helen.

This chair is held by Vladimir Zharov, Ph.D., a world-renowned laser and nanomedicine researcher at UAMS. Today, Zharov continues his pioneering research in identifying circulating tumor cells in the blood vessels of cancer patients, which will have a major impact on future cancer diagnosis, treatment and follow-up.

Dr. Zharov is also an accomplished violinist.
Vladimir Zharov, Ph.D., in his lab.
Frits van Rhee, M.D., Ph.D., the chairholder, is helping develop personalized medical treatments by examining the way genes are expressed in multiple myeloma, a cancer of the blood’s plasma cells. By identifying a patient’s unique disease characteristics, he can employ specific targeted therapies.

Helping fund that work is one way Charles Scharlau of Fayetteville is honoring the care the UAMS Myeloma Institute provided his late wife, Clydene. Scharlau, the retired chairman and CEO of Southwestern Energy Co. and former chair of the University of Arkansas Board of Trustees, is also on the UAMS Foundation Fund Board and the UAMS Northwest Advisory Board, and is a member of the Society of the Double Helix.
Paul Wendel, M.D.
Chair in Maternal-Fetal Medicine

Paul Wendel, M.D. told Judy Adams he would do everything in his power to make sure her grandson, Noah, was delivered a healthy baby. The grateful grandmother, in turn, gave back along with 1,500 patients and their families, by raising funds to honor him and help other women with at-risk pregnancies.

As chairholder, Wendel uses the support to help in educating future maternal-fetal medicine specialists and ensuring pregnant patients have the care they need to deliver babies as healthy as Noah.

At UAMS, we have assembled a world-class obstetrics team to ensure the best possible care of mothers and their babies.
Patricia & J. Floyd Kyser, M.D.
Professorship for Otolaryngology-Head & Neck Surgery

Watching a UAMS medical resident under his tutelage repair an extensive facial fracture on a trauma patient who survived a small plane accident, J. Floyd Kyser, M.D., knew the young doctor would excel as a trauma surgeon and more.

Years later, Kyser and his wife created the Patricia and J. Floyd Kyser, M.D. Professorship in Otolaryngology-Head and Neck Surgery in honor of that young surgeon, now a renowned UAMS physician. Today, James Y. Suen, M.D., is an authority on vascular malformations and cancer of the head and neck. He has penned six textbooks on these subjects that are used by medical schools worldwide.
Jeff & Kathy Lewis Sanders

College of Pharmacy Endowed Chair in Pediatrics

Kathy Lewis Sanders, a graduate of the UAMS College of Pharmacy, spent 30 years working as a pharmacist in a neonatal intensive care unit in a Texas hospital. That experience led her and her husband, Jeff, to endow a chair to ensure the best possible pharmacy care for children and families.

Holly Maples, Pharm.D., associate professor in the UAMS College of Pharmacy, is using that endowment to help children by continuing to build the pediatric pharmacy program that educates tomorrow’s pediatric pharmacists with a goal of improving patient care through an interdisciplinary approach.

(Left) Holly Maples, Pharm. D., seated, with (left to right ) Kathy Lewis Sanders, Jeff Sanders, and Emily Sanders.
Nicholas P. Lang, M.D. & Helen F. Lang, R.N.  
Professorship

Helen F. Lang, R.N., spent her entire career caring for her patients both in the operating room and in the recovery room at Arkansas Children’s Hospital and the John L. McClellan Veteran’s Hospital. She also was instrumental in educating surgical resident physicians.

Nicholas Lang, M.D., a retired surgeon, was moved to honor his wife’s devotion by creating this professorship. The inaugural recipient, Dr. Claudia Barone, a former dean of the UAMS College of Nursing, will use the professorship funds to further ongoing research in nursing.

Primary care health professionals are in great demand, and this newly created chair will allow UAMS to significantly advance its focus on educating more such professionals to address the shortage.

Arkansas Blue Cross and Blue Shield named the chair in honor of its retired president, a 1956 UAMS graduate, to honor his legacy. The chair is an investment in a partnership with UAMS to provide quality health care and ensure that excellent primary health care is secure for all of Arkansas. Focused on innovations in primary care, it will foster the incorporation of team-based care, health promotion, health literacy and population health strategies into a primary care setting.
At 17, Lewis E. Epley, Jr. struggled to recover from polio. His physical therapist, Corrine Wulkan Larson, and his mother, Evelyn, showed him the way.

As Corrine pushed him to strengthen his left arm, Lewis discovered his own strength and courage. This was a defining moment in his life. The oldest of all patients at the Jacksonville Children’s Convalescent Center, Lewis was also challenged to set an example for the other children. As his physical therapist pressed him to adhere to his therapy, he became able to show others they have greater potential than they may think. When he left Jacksonville to resume his senior year at Springdale High School, Lewis and his mother took with them a new strength and promising attitude.

Later in life, Mr. Epley wanted to make available to the people of northwest Arkansas the training that had not only rehabilitated his body, but cultivated his character. The region had no program to train physical therapists, so Mr. Epley stepped in to lead the development of the educational program on UAMS’ northwest Arkansas campus in Fayetteville.

He wants those students to understand they can shape the lives of their patients the way a skilled therapist and a determined mother forever changed his.

“Establishing this program in northwest Arkansas will produce new therapists who will be in high demand in the region,” said Peter O. Kohler, M.D., vice chancellor for UAMS’ Northwest Arkansas Campus. “It also fits well with the education programs we already have at UAMS’ Northwest Arkansas Campus for medical students, pharmacy students, nursing and health professions students who will all be learning team-based care together in our clinic settings.”
This anti-gravity treadmill is used by patients and in training physical therapists at UAMS Northwest Arkansas Campus.
Serving as chair of the UAMS Foundation Fund Board is an honor. By working with others to promote and preserve the phenomenal work of UAMS, I gain so much. It is a privilege to be a part of this world-class institution, and my participation on the board allows me to have a hand in securing the future of health care for our state and beyond.

Through the years I have had the opportunity to serve in many capacities at UAMS, and I remain active in supporting several units across campus. It is truly amazing to watch intelligent, dedicated team members who choose to put their talents to work here in Arkansas. We are so fortunate to have an institution right here at home that has the ability to attract and retain the brightest minds in service for our family, friends and neighbors.

It’s impressive to know that these talented individuals can choose to practice most anywhere, and they come to UAMS because they not only want to be the best, but they want to be surrounded by the best. We have a great responsibility as members of the Arkansas community to promote and preserve UAMS to ensure that our loved ones have the best of what the future holds.

Our mission also benefits from a wealth of passionate and committed volunteers to UAMS. Each year, more than 1,400 community members lend their time, energies and talents. They serve as thoughtful advocates for our patients working to enhance their caring experience, they provide assistance as navigators to those newly under our care to ease their anxiety, and they work to assist us in creating a care environment that is second to none. Four hundred business and community leaders serve on 21 distinct UAMS-affiliated advisory boards. They all serve for many reasons, but undoubtedly they serve because they believe in the advancement of this extraordinary institution. We have volunteers from all over the U.S. — and even foreign countries — each with their own expertise to enhance the essential work of UAMS.

The input and skill of so many sharp minds at work toward a common goal is a powerful thing. They give, providing their hands and hearts. It’s such important

and gratifying work. The caliber of our board members and their contributions is impressive. UAMS is a stronger institution because of our volunteers. There is much to be gained by working together to pool our talents. It is so satisfying to be a part of this process.

I hope you’ll take time to learn more about the impact of philanthropy at UAMS and the many accomplishments it makes possible. Together, we are making UAMS and our state a better place with a brighter future.

My heartfelt thanks go out to everyone who serves to advance the mission of UAMS and if you aren’t yet involved, I urge you to do so. Just send an email to advancement@uams.edu along with your contact information and interests.

Patricia S. “Patti” Bailey
Chair, UAMS Foundation Fund Board

The UAMS Office of Global Health (OGH) was created in 2012 as an institutional mechanism for coordinating global health activities and supporting UAMS faculty, staff and students in their efforts to improve the health of world populations, individuals and communities. The OGH facilitates interdisciplinary global health service, teaching and research in an equitable and sustainable manner.

Recently participated in the 60th anniversary celebration of Kaohsiung Medical University (KMU). UAMS was the first sister school to KMU, a partnership that began in 1984.

Part of a historic trade linkage for the state of Arkansas and the Volta Region of Ghana.
The expected five-year survival rate for newly diagnosed myeloma patients treated at the Myeloma Institute is 74%, versus 43% for a comparable patient population in the NCI cancer statistics (SEER) database.

The Myeloma Institute has performed more than 9,500 peripheral blood stem transplants – more than any other center in the world – for multiple myeloma and related diseases.
Psychiatric Research Institute Advisory Board

The Brain Imaging Research Center applies MRI technology to explore the biology of the human mind and mental illness with a goal of improving the treatment and decreasing the incidence of mental illness.

Total National Institutes of Health (NIH) funding -- $52.5 million

The UAMS Translational Research Institute has helped 16 promising new researchers launch stable, independent research programs since 2009 by providing research, salary and mentoring support.

The J. Thomas May Center for ALS Research is the only research center for Amyotrophic lateral sclerosis in Arkansas.
The Society of the Double Helix

The University of Arkansas for Medical Sciences gratefully acknowledges the outstanding philanthropy and exemplary leadership of individuals, foundations, corporations and organizations that have contributed $100,000 or more to the institution since its founding in 1879. To honor these generous contributors – past, present and future – the UAMS Foundation Fund Board established the Society of the Double Helix on March 10, 1998.

The members of the Society of the Double Helix have revolutionized the environment at UAMS through achievements realized with their support. They have helped to fund student scholarships, faculty and research endowments, state-of-the-art equipment purchases, construction of modern facilities and clinical centers of excellence.

Induction Ceremonies

Through the years, the philanthropic contributions of members of the Society of the Double Helix have helped advance the comprehensive mission of the University of Arkansas for Medical Sciences to achieve international recognition.

UAMS in turn, has proudly held formal recognition ceremonies to officially induct philanthropic contributors into the Society with the first such ceremony held in 1998. Members inducted in 1998 represent the founding members of the Society of the Double Helix.

The UAMS Legacy Society

The UAMS Legacy Society was started in 2005 to recognize donors who had included UAMS in their estate plans. Today there are over 160 families, from 17 different states as part of this group. Collectively they have committed over 25 million dollars in gifts to UAMS through charitable trusts, gift annuities, and bequests in their will. They are providing scholarships for students in Nursing, Pharmacy, Public Health, Medicine and Health Professions. They are also providing research dollars for cancer, Alzheimer’s disease, blindness, psychiatry, neurology, myeloma, and many other areas. These gifts include new professorships and chairs that will allow UAMS to recruit and retain the best and brightest faculty and researchers. We are so grateful for the leadership and generosity of these members of the UAMS family.

“The true meaning of life is to plant trees, under whose shade you do not expect to sit.” - Nelson Henderson

160 legacy society families from 17 states

The UAMS Foundation Fund and the Winthrop P. Rockefeller Foundation Fund are sub-organizations of The University of Arkansas Foundation, Inc., a 501(c)(3) non-profit corporation. [Tax ID # 71-6056774]. To opt out of future development mailings, please call (501) 686-8200 or send an email to IAUpdates@uams.edu.
Ours is important work. We collaborate with leaders from every aspect of operations with a most significant purpose—to ensure our institutes and programs are equipped for the challenges and opportunities ahead. We constantly strive to meet the ever-growing needs of a dynamic and highly innovative environment such as ours. With your support, we focus on delivering the resources needed for UAMS to fulfill its mission as the state’s only academic medical center.

We’re most thankful for the confidence you place in us. By putting your generous gifts to work in creative ways, you help ensure the future of health and health care for so many. We endeavor to produce a tremendous return on your investment in UAMS. We seek to be thoughtful stewards of your powerful gifts.

We present this informative report as an illustration of our commitment to you, our benefactors. Through it, we trust you will gain key insight into how your investment is paying off in significant ways to achieve a great deal for so many. Included are a number of dashboards to provide a quantifiable depiction of the impact of philanthropy during fiscal year 2014. We also measure our success by the quantity and quality of volunteer leaders who lend their talents to UAMS in service on our various advisory boards.

Thank you for your many gifts. Your gifts of time, talent, expertise, relationships and resources are invaluable. Without you, we could not be Arkansas’ premier health sciences center. With you, we will achieve a new age of education, innovation and health care.

Thank you for caring about Arkansas.

Lance Burchett
Vice Chancellor for Institutional Advancement Executive Director, UAMS Foundation Fund

143 events and activities orchestrated by UAMS staff and volunteers attracted 12,969 attendees, both on and off campus.

UAMS ranks in top 18% of all U.S. colleges & universities in research funding from federal government

This report is published by the UAMS Office of Institutional Advancement. Every effort has been made to provide a complete and accurate listing of donors and gifts. Please accept our sincere apologies in advance if any mistake or omission has been made. Please contact us at advancement@uams.edu or call (501) 686-8200 to report any inaccuracies, and we will be happy to correct our records.

For donor recognition purposes, gift totals include gifts, pledges and gifts-in-kind. Donors that have requested anonymity have been excluded.

Individual and household names appear as they existed at the time of induction. The gift levels represent those at the close of Fiscal Year 2014 (June 30, 2014).

We wish to thank UAMS Communications and Marketing for their time and support with this effort.

Additional copies of this report are available by calling (501) 686-8200 or by emailing advancement@uams.edu.
